Anaerobic Microbiology Sleeve Kits

Supplied as ready-assembled
units

Neoprene seals available for
anyone concerned about latex
allergies

The sleeve components come as ready-assembled kits for ease of use.

The standard unit is supplied with a flexible, robust latex wrist seal –
one size fits all.

For those customers who are concerned with latex allergies, the sleeve
assemblies are available with Neoprene wrist seals – available in
standard and large sizes. It should be noted that the Neoprene seals
have lower elasticity and are less durable than latex seals.

Replacement sleeves and cuff rings are available should either of
these components need replacing. Pairs of replacement wrist seals
can also be purchased should they start to show signs of wear.

Complete Sleeve Kits

A02820	Sleeve kit with latex wrist seal (one size fits all)	£60.00
